

Ewon Edge and Cloud

**Fits your needs today.
Scales with you tomorrow.**

Secure, scalable connectivity for remote access and industrial data.

Connect machines.
Empower services.
Grow your business.

FROM MACHINE SALES TO SERVICE-DRIVEN GROWTH

Your machines perform. But expectations have changed.

Machines are no longer just products. They are the foundation of a long-term service relationship.

Your customers now expect continuous uptime, fast support, and clear ROI across the entire machine lifecycle.

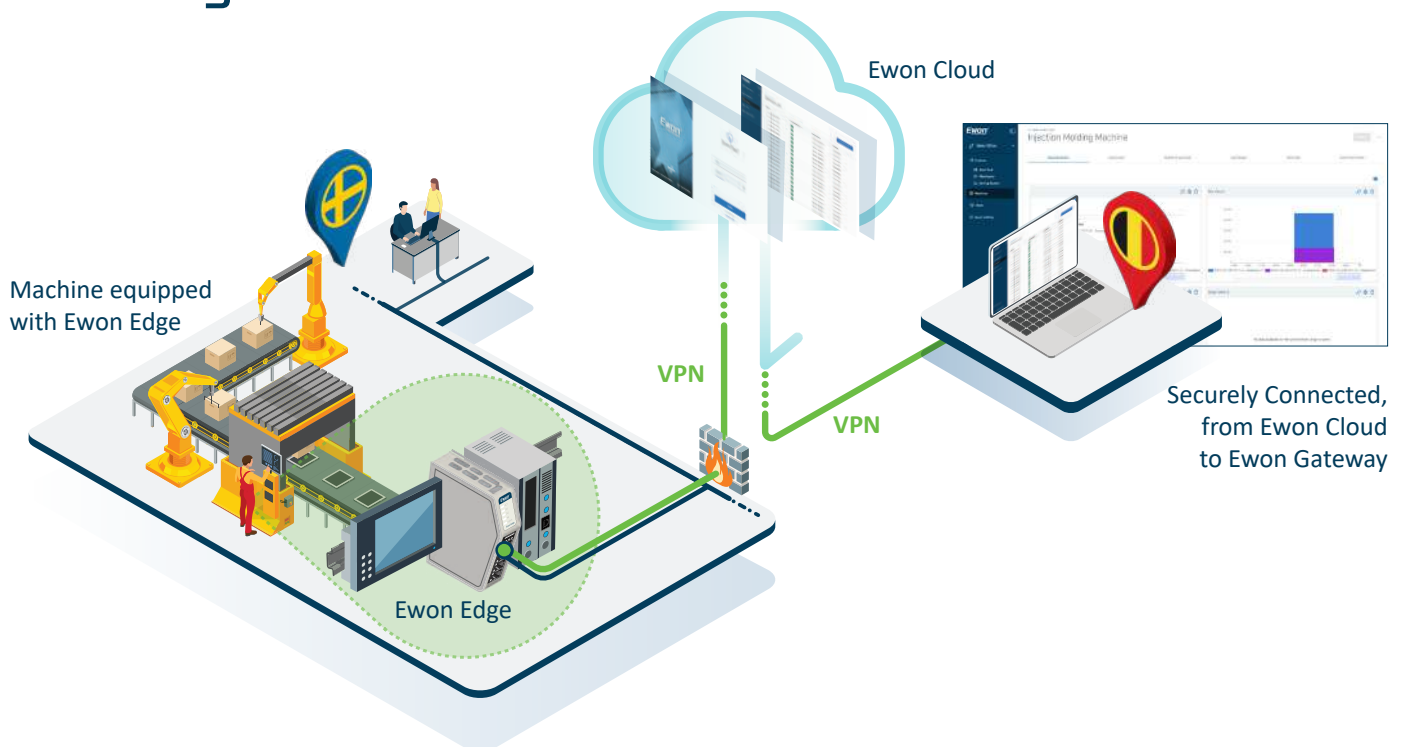

The machine sale is no longer the end of the journey. It is the beginning.

To stay competitive, machine builders must move from equipment delivery to continuous service: remote support, operational visibility, and data-driven services.

Ewon Edge & Cloud enables this shift with secure connectivity that support your customers in real time and unlocks new service-based business models for the future.

HOW IT WORKS

One platform. Multiple capabilities. Evolving over time.

Ewon Edge & Cloud combine industrial gateways and cloud services into a unified, secure, and scalable connectivity solution. Industrial gateways securely connect machines to the cloud, enabling remote access, centralized management, and industrial data services in one environment.

Designed for industrial OT environments and trusted by IT teams, the platform ensures secure connectivity between machines, users, and systems, with centralized user and access management across the entire infrastructure.

Start with secure remote access today and scale toward data services over time.

EASY BY DESIGN. BUILT FOR INDUSTRY

Easy and Swift Installation

Operational in minutes with a **plug-and-play** industrial gateway designed for OT and IT environments. **No complex** setup. No heavy training. Just **fast, intuitive** onboarding from day one so teams can focus on operations, not setup effort.

IT-Friendly

Designed to align with enterprise IT security and compliance standards

- Single Sign-On (SSO) — latest technology standards
- VPN tunneling on demand + deny by default
- Full audit logs — who accessed what, when
- MFA enforced on every session
- TLS 1.3 encryption · 50% of customers use external gateways

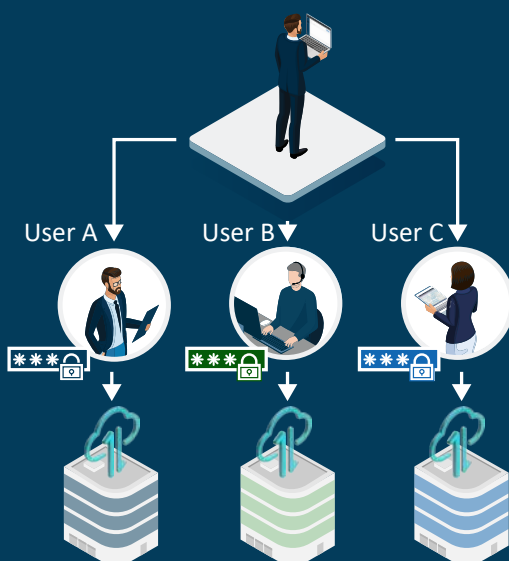

User-Centric

Simple and unified access

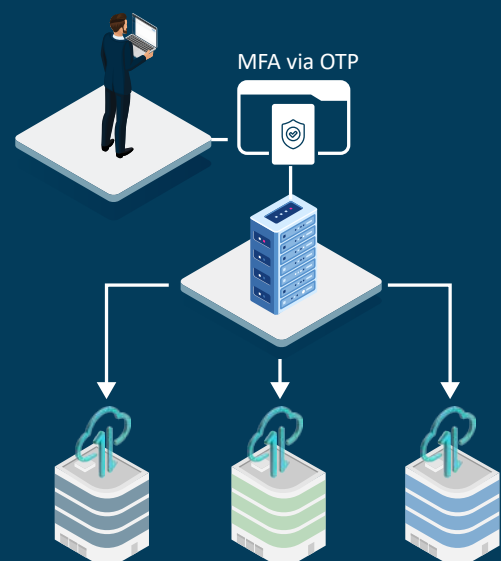

- 1 email = full access across entire Ewon environment
- No fragmented access or duplicate credentials
- Simplified onboarding — invite once, access everything

STANDARD SOLUTION

Complex user management
More security concerns (Security policy?)
Less standadization (MFA?)

USER-CENTRIC

Simple user management
Unified security policies (MFA)
Improved trust between companies

Adapt and Scale

Cloud-first, subscription-based — No hardware replacement

- Pay only for what you need today — start small, grow fast
- 3× faster remote access than previous generation
- Worldwide availability — capacity lives in the cloud
- Cloud-configured — gateways automatically sync with every update

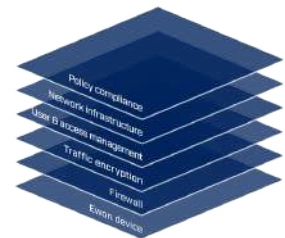

Security First

Built to stringent IT and OT security requirements

- HMS ISO 27001 certified
- NIS2 compliant · IEC 62443 aligned · CRA ready
- On-site remote access control — firewall enforced at edge
- Nothing left open by default — deny-by-default architecture
- TLS 1.3 encryption

Layered
security
approach

Built for the Future

Proven at scale, ready for tomorrow

- Modular architecture
- Global, geo-redundant infrastructure with worldwide VPN connectivity
- Continuous platform evolution
- Ready for future services
- Backed by HMS Networks — global support network

Start small. Scale with confidence.

EWON CLOUD CAPABILITIES

Flexible cloud capabilities that scale with you.

Ewon Cloud delivers secure remote access, device management, and industrial data services through a modular subscription model.

Access Plans

- Standard Access (Available now!)
- Advanced Access (Available now!)

Insights Plans

COMING
SOON

- Standard Insights
- Advanced Insights (Early Adopters)

Start simple. Scale when ready.
Capabilities scale progressively—from essential remote access to advanced industrial insights and analytics.

EWON EDGE GATEWAYS

Choose the right gateway

The Ewon Edge & Cloud platform includes industrial gateways that connect machines securely to the cloud. These gateways are designed to match different levels of operational complexity and digital ambition.

Edge 300 Series

- Compact industrial environments
- Cost-efficient deployments
- Standard machine connectivity

Edge 400 Series

- High-performance environments
- Complex machine setups
- Extended connectivity requirements

Capabilities	Edge 300	Edge 400
Max devices (TBC)	~1000	~2250
Storage	4 GB	10 GB
Memory	1 GB	2 GB
Ethernet	4 ports (10/100 Mbps)	4 ports (1 GbE)
Modularity	Up to 2 extensions	Up to 3 extensions
Container support	—	
Wi-Fi	Wi-Fi 6 - 2,4GHz/5GHz	Wi-Fi 6 - 2,4GHz/5GHz
4G	Extension card	Extension card
DI/DO	2DI / 1DO	2DI / 1DO
USB Type A	1 on main board	1 on main board
GPS	On 4G extension board	On 4G extension board
Internal battery	Super cap	Super cap
Temperature	-25°C to 60°C	-25°C to 60°C

Both Edge series are part of a single unified Edge and Cloud platform architecture.

More than connectivity. A long-term platform partner.

With Ewon by HMS Networks, you are not just adopting technology. You are building on a trusted industrial connectivity platform designed to support your operations today and evolve with your business over time.

600,000+ gateways deployed worldwide

- 20+ years of industrial connectivity expertise
- 23+ offices worldwide
- Global industrial support network
- Unified Edge & Cloud architecture
- Secure remote access specialization
- Continuous platform evolution

Start with Remote Access today.
Scale your industrial connectivity tomorrow.
